**MANAGEMENT DISCUSSION AND ANALYSIS****Company Background:**

Pradeep Metals Limited (Company) is engaged in the manufacture of intricate closed die stainless, alloy and carbon steel forgings as finished and semi-finished machined components.

The Company uses state-of-the-art machinery with sophisticated tool-room equipment to manufacture its forgings. The Company also employs hi-tech design and analysis software to create dies and tooling that play a key role in the production of forgings. The manufacturing plant is integrated with complete facilities for testing, cutting, die making, forging, heat-treatment and finishing. Recently, The Company improved its machining capacity and capabilities by adding new Computer Numerical Control (CNC) Machines and Vertical Machining Centers (VMC).

The Company uses an in-house laboratory, process control, continuous improvement principles, and an online integrated system to closely monitor the quality of its operations. These quality assurance systems have been approved by Global Original Equipment Manufacturers (OEMs) including nuclear grade and high-pressure equipment OEMs in Germany, USA and Canada. The Company is certified to ISO 9001:2008 for sixteen consecutive years and TÜV Pressure Equipment Directive 97/23/EC (PED) standards.

The Company currently serves 5 major industry verticals: instrumentation, oil & gas, petro-chemical, automotive and general engineering. Customers are located in India, USA, UK, Singapore, Sweden, Denmark, France, Germany, Mexico, Argentina and Turkey.

Performance:

The Company's increase in sales can be attributed to three major reasons: First, the global economy within the instrumentation manufacturing, oil & gas, and general engineering industries improved during the current year. Second, the Company realized increased demand for products in its Domestic, Western Europe, and North American customer base. Third, the Company grew its customer base resulting in a further increase in turnover and profitability.

The Company managed to control its manufacturing costs despite increase in fuel, oil, labor, electricity prices and interest rates. Responding to a rising trend in demand for finished machined components, the Company invested in additional equipment and capacity for manufacturing finished products for its customers. In spite of these factors, the Company's turnover has increased by 34.23% and EBITDA by 20.08% during the year.

Current Business Environment:

The overall business environment for the Company is stable in the European and North American markets. The Company has also observed increasing demand from new customers in the Domestic and South American markets. The Company intends to exploit these markets while continuing to serve its current customer base.

Last year, the US government abolished its anti-dumping duties on stainless steel flanges. The Company took advantage of this change and commenced exports of stainless steel flanges to North America and intends to increase the share of this market. In addition, the Company entered into an Agreement for sale of gear blanks to a large European customer, potentially leading to a large upside in turnover and profitability.

The rising prices of energy, steel and labour compounded with high inflation in the country have put a competitive pressure on pricing and may result in lower profitability. There is also rising concern about the Company's foreign financial borrowing due to high fluctuation in currencies. Last year, The Government of India substantially reduced export benefits that may pose a threat to margins in the following years.

Future Outlook:

The Company will continue to focus its efforts to increase revenues by developing new products for its existing customers and by expanding its customer base around the Globe.

The Company has planned a capital expenditure of about Rs. 15 crores over the next two years for changes in the existing plant layout to improve the productivity of workers, utilization of machinery, and flow of material. It has also decided to strengthen its Research & Development Department to develop energy efficient systems, improved die designs, improved yield, reduction in use of consumables and better machining techniques.

The Company plans to set up a new manufacturing facility in Gujarat for producing flanges and similar components, which are expected to consistently rise in demand. This will release capacity at the existing plant to manufacture new intricate profile products for the existing and new customers, particularly in the valves, manifolds and oil & gas industry products.

Cautionary Statement:

Details provided hereinabove relating to various activities and future plans may be “forward-looking statements” within the realm of applicable laws and regulations. Actual performance may differ substantially or materially from those expressed or implied. The Company may need to change plans or other projections due to changes in Government policies, tax laws and other incidental factors.

Dear Shareholder,

Ref: Green Initiative in the Corporate Governance: Go Paperless

The Ministry of Corporate Affairs ("MCA") has taken a 'Green initiative in the Corporate Governance' by allowing paperless compliances by companies vide its Circular Nos. 17/2011 dated 21/04/2011 and 18/2011 dated 29/04/2011 inter alia stating that the service of documents by the companies to its members can be made through electronic mode.
